SENIOR SOFTWARE ENGINEER

Energetic and innovative senior software engineer with **6 years** of experience in developing robust code for high-volume businesses. An enthusiastic team player and deep creative thinker. Expert in advanced software development methodologies, and tools, leading teams, designing and rollout of cutting-edge software solutions. Integrated and leveraged advanced AI models such as **OpenAI GPT**, **VideoGen**, **Gemini**, and **DeepSeek** to enhance applications with cutting-edge capabilities in natural language processing, video generation, and data analysis. Spearheaded the integration of **OpenAI's GPT models** for conversational AI, enabling rich and responsive chatbot experiences and automated content generation. Utilized **VideoGen** for AI-driven video creation, streamlining multimedia workflows and enhancing user engagement. Worked with **Gemini** for advanced data processing and pattern recognition, optimizing predictive analytics and recommendation systems. Integrated **DeepSeek** for real-time data analysis and intelligent search functionalities, improving decision-making and business insights. Successfully implemented **API-based integrations**, ensuring seamless communication between front-end interfaces and backend AI models, while optimizing for performance and scalability

TECHNICAL SKILLS

Languages	: JavaScript, TypeScript, Express, Ruby, Java, C++, XML, YAML
AI Tools	: Generative AI, openAI, LAMA, Gemini, Devinci, VideoGen
Frameworks	: React js, Nodejs, Next js, React Native, GraphQL, Redux, Angular, Vue, Spring boot, Web3
Databases	: MySQL, SQLite, AWS, Mongo, Firebase, Postgress, RealM db, Reddis, Neo4J
Cloud Tools	: AppCenter, Jira, GitHub, Gerrit, Heroku, Code Commit, Gitlab
DevOps	: AWS, ECS, ECR, Fargate, EC2, EBS, Cloudwatch, Dockers, Kubernetes, Terraform
Microservices	: Apache Kafka, Kafka Streams, Kafka Connectors, RabbitMQ, AMQ, Pub/Sub
Dev Tools	: VS-Code, IntelliJ, Eclipse, Sublime, Android Studio, Xcode, Insomnia, Postman

EXPERIENCE

Senior Software Engineer **Feb 2022 - Current**
CodingCops:

- Successfully executed the **architecture**, **development**, and **deployment** of B2B solutions for the Hospitality Industry.
- Demonstrated proficiency in planning and executing to microservice architect, resulting in a **35% performance improvement.**
- Actively engaged in all facets of agile methodology, encompassing requirements analysis and continual support for the organization's products and services.
- Contributed to preparing documents outlining **test-driven development** best practices, technical documentation, user manuals, and GAP analysis.
- I automated the **CI/CD pipeline** for prime product and added automated tests using Junit that brought down the time to release any feature into production to negligible
- I identify areas for improvement in the development process and suggest appropriate solutions.
- Participated in code reviews, automated testing, and quality assurance to ensure the highest of software.
- Promote the use of git sub-modules for code reusability across the product line.

Software Engineer **Oct 2020 - Jan 2022**
TectSoft:

- I create and build **B2B** and **B2C portals** of factory products that are utilized globally by both businesses and individuals.
- Revitalize portal matching workflows to minimize turnaround time and maximize sales.
- One of the clients from the retailer's industry gets a sharp increase in sales of up to **20%**.

- Support L1 teams by attending triage meetings and providing technical assistance.
- **Troubleshot** and **fixed issues** in the Gitlab pipelines to ensure **smooth delivery of** release builds.

Software Engineer
TectSoft:

- Worked on various mobile apps for the Namibia government clients encompassing design, architecture, and publication.
- Research and development on Optical character recognition using React Native, and Tesseract to improve accuracy.

- Build from scratch and equipped with an advanced and user-friendly interface. It enables efficient management of police verification of citizens through police stations.
- Redesigned newsfeed experience by designing and implementing a new mobile app.
- It solves document verification, scanning, attesting, police verifications, and gesture security-like features.
- Configure TFS on-premises by local legal regulations to ensure that the code is kept on-premises.

EDUCATION

Lahore Garrison University Lahore, Pakistan
Bachelor of Science in Software Engineering

RELEVANT PROJECTS

Itqan *React Native, React js, Node js, GitLab, AWS* TectSoft

- Developed a user-friendly mobile and web application that allows for easy and efficient solutions for daily household tasks like plumbing, electrician, etc.
- We have provided comprehensive support for commissioning and initial MBE installations through the app, resulting in faster and more accurate installations.
- Successfully integrated Admin panel to monitor customers and partners.

Smeisty *React js, Node js, Blockchain, Ethereum, MetaMask, OpenSea* TectSoft

- Designed and developed to manage NFTS of contract addresses and wallet transactions.
- Optimized application for **speed and user experience**, and utilized **responsive design** to ensure compatibility across all devices

IVY *Ruby on Rails, React js, Hanami, Heroku, Datadog, Redis* CodingCops

- It helps in efficiently looking after the hospitality industry including bookings of guests, performing actions of guest's created tasks, providing SMS facility and other hotel management features.
- Implemented an effective personal activity management system, allowing for easy tracking of guest's tasks, bookings, and deadlines, resulting in improved time management and task completion.

Spiderman Web: *Java, Junit, Kafka, AWS, Chaos Search, Sonarqube* CodingCops

- Implemented multiple microservices connected and listening/publishing data on specific topics.
- Microservices include email verification, geolocation tracker, currency exchanger, and refinery.

ShiftERP: *React js, PHP, FileZilla, Node, Jest* TectSoft

- Implemented ERP system for factory products like parts, assemblies etc.
- Monitor admin, partner, and customer panels.

MindMiner: *React js, Nodejs, AWS ECR, ECS, Fargate, Blockchain* CodingCops

- Using Generative AI' for creating solutions to a problem and mint as NFT.
- Pricing NFT and sell your inventions.
